ENROLLMENT RANKING OF INDIANA PUBLIC SCHOOL CORPORATIONS 1970-71

The data on the following pages has been developed to meet requests from many individuals, and is merely a grouped set of the 319 Indiana school corporations based on highest pupil enrollment to lowest pupil enrollment. The enrollment figures for each corporation were derived from the OSPI-EIR-1, Fall Enrollment reports from individual schools to the Office of State Superintendent of Public Instruction. The more detailed corporation enrollment report by grade level will be published in the Statistical Report for Indiana School Corporations 1970-71 (Table A-1).

The total fall pupil enrollment in Indiana public schools for the 1970-71 school year is 1,231,458, an increase of .63% from the 1,223,747 enrolled in 1969-70. This increase, however, is the smallest in any one year since the mid 1940's. The state total fall enrollments for the past nine years are presented in the back of this brief.

An apparent, but interesting observation with regard to the corporation sequence is the extremely high percentage of total pupil population contained in the first 15 school corporations. 431,875 pupils or 35% of the entire state's public enrollment are in these top 15 corporations. One can make his own observations as to the economic-urban characteristics of the latter. Conversely, 799,583 pupils or 65% of the state total attend school in the last 304 corporations.

A further similar and very significant observation is that the highest 35 corporations in rank contain 626,148 pupils or 51% of the state total, illustrating a majority of the state's pupil enrollment in relatively few corporations.

Such variances are certainly due in part to the effects of many school reorganizations, local preferences and the great time differentials occurring in

district reorganization. However, the disparity in corporation enrollments does not automatically imply anything more than a statistical comparison and internal administrative differences.

Some factors to consider in future pupil school enrollment trends in each corporation involve:

a. non-public school enrollments

b. vocational education development on secondary level

c. special education program funding and implementation

d. kindergarten and nursery school programs

e. birth rate

f. holding power of the secondary school based upon:

    1. certified, quality staff
    2. relevant instructional programs

g. move in rate of new families and students based upon:

    1. geographical location of corporation
    2. type of housing, employment opportunities

h. state share of local school program costs

i. future school reorganization

ENROLLMENT OF INDIANA PUBLIC SCHOOL CORPORATIONS RANKED BY LARGEST TO SMALLEST SCHOOL CORPORATION FOR SCHOOL YEAR 1970-71

February, 1971
